FOR IMMEDIATE RELEASE

Cabezon Group participates in the International Drone Expo (IDE)

Cabezon Group senior leadership and engineering staff participated in the 2015 International Drone Expo, IDE from 11-12 December 2015 at the Los Angeles Convention Center. The IDE brought together international small Unmanned Aerial Systems (sUAS) delegations and associations, business and government leaders, general aviation associations, and drone Innovators from around the world; and was reportedly the largest drone expo and business conference held to date. A myriad of commercial applications in unmanned platforms, sensors and related technologies were exhibited, to include: emergency management disaster response, mapping, agriculture, utilities, mining, and engineering.

“The IDE was an amazing opportunity to experience the latest in international sUAS technologies and provided Cabezon Group a platform to further educate the industry on their many uses in emergency management and disaster response to all-hazards incidents.” said John Fisher, Cabezon Group’s Chief Executive Officer.

About Cabezon Group

Cabezon Group (www.cabezon.com) is professional services firm based in the Washington, DC, metropolitan area, and has been solving complex and mission critical challenges for the U.S. government for the last 10 years, with a particular concentration in Homeland Security and Emergency Preparedness and Response for federal departments and agencies such as the Department of Homeland Security

(DHS), Federal Emergency Management Agency (FEMA), and Department of Health and Human Services (HHS). Cabezon Group is presently at the forefront of developing UAS technologies, processes, and training protocols for a wide diversity of client mission requirements.
